CERTIFICATION MARK

МЛ04

GOST R (RST) mark for obligatory certification

It might be called as *traditional* Russian certification mark. There are 3 kinds of this mark and 3 cases when you must use this mark for labeling your goods or equipment. First of all, you must obligatory label by this mark every item of your production which was certified in GOST R system and an obligatory GOST R certificate (yellow GOST R certificate) was issued for this product. In this case ID code of certification body (МЛ04) must be pointed under the mark. You can download images of GOST R marks in pixel and vector formats.

GOST R (RST) mark for obligatory declaration

If your equipment or goods was obligatory declared in GOST R system, such equipment or goods must be marked by GOST R certification mark without certification body ID under the mark. We suppose you can yourself remove ID certification code from previous file.

GOST R (RST) mark for voluntary certification

If your equipment or goods was voluntary certified in GOST R system and voluntary GOST R certificate was issued (blue GOST R certificate) in this case you must use certification mark with sign “Добровольная сертификация”. You can download images of this GOST R certification mark in pixel and vector formats.

TR mark

In special cases when you have an industrial equipment or machines which were certified or declared in accordance with safety requirements of special or common technical reglaments (TR), you must label your equipment with TR mark. You can download images of this TR certification mark in pixel and vector formats. There is no differences between obligatory, voluntary, certification and declaration marks.

Eurasian Conformity mark

Non-applicable certification marks. Certification mark #5 (or Eurasian Conformity mark) will be come into force when Custom Union technical regulations will be accepted by Custom Union comission of Russia, Belorussia and Kazakhstan. Now it’s only project. If you’ve got Custom Union certificate for your goods you must mark your certified goods by national certification mark of country, where Custom Union certificate was issued. In our case it’s МЛ04 mark.

Additional information only for skillful technical regulation managers

No GHOST certification mark in Russia. You ought to ask others relevant authority bodies to apply such mark. Unfortunately we don’t have enough experience to recommend you someone who can help you.

No TELECOM certification mark in Rusia but we would be glad to provide telecom certification and telecom declaration for you.
